**MOSQUITO ABATEMENT CHECK LIST**

Here are some places where you might find mosquito larvae in your yard. You may want to save this list so you can check your yard once a week - especially during the summer months.

**COMPLETED**

\_\_\_\_\_ Have you thrown away or covered any old tires in your yard?  
(For tire swings or playground equipment, drill a hole in the bottom to drain the water.)

\_\_\_\_\_ Are there any toys left out in the yard that hold water?

\_\_\_\_\_ Check tree-holes for water. If water is found, fill or treat the tree-hole.

\_\_\_\_\_ Keep ditches clean of weeds, trash and lawn clippings to prevent mosquito breeding sites.

\_\_\_\_\_ Saving rainwater for plants? Cover the bucket with a piece of window screen.

\_\_\_\_\_ Flush out your birdbath once a week to prevent mosquito breeding.

\_\_\_\_\_ Any tin cans, bottles, or debris in your yard? Throw them out before they become mosquito homes.

\_\_\_\_\_ Is your pet's water bowl outside? Clean it and add fresh water every day. Mosquitoes can transmit dog heartworm, too!

\_\_\_\_\_ Empty swimming pool tarps, boat tarps, etc.

\_\_\_\_\_ Clean roof gutters. Empty tarps that hold water.

\_\_\_\_\_ Empty wading pools daily.

\_\_\_\_\_ Is there anything else in your yard which holds water and can breed mosquitoes?
